INTRODUCTION

The 1997 Traffic By Sections publication depicts the National Highway System (NHS), State Primary, State Secondary and State Urban Routes after the implementation of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA).

This report presents statistical information on traffic volumes Annual Average Daily Traffic (AADT) and Vehicle Miles of Travel (VMT) on Montana's National Highway System and State Routes for the years 1995, 1996 and 1997. The statistics are presented in four sections: Interstate, "P" Routes with portions of the NHS, State Secondary and "U" Routes with portions of the NHS. These are given as weighted¹ AADT between section control points². On the Interstate and "P" Routes, AADT and vehicle miles of travel for commercial vehicles are also provided.

The Highway Information System (HIS) has been updated to reflect the NHS and the State Routes designated by the Transportation Commission in November of 1993 and signed into law by the President on November 28, 1995. The 1997 Traffic By Sections publication reflects those changes.

For specific traffic count and location information, contact the Traffic Data Collection Section at (406)444-6122.

¹Computer process that averages the data between section control points.

²Section control points consist of any point that reflects a traffic change on a roadway such as junctions, intersections with other roadways and intersections with county, municipality or urban boundaries.

Abbreviations and Acronyms used in the Report

AADT - Annual Average Daily Traffic

ADT - Average Daily Traffic

FAI - Federal Aid Interstate

"P" - Non-Interstate NHS and State Primary

"S" - State Secondary

"U" - NHS in Urban Areas and State Urban

HIS - Highway Information System

ISTEA - Intermodal Surface Transportation Efficiency Act

NHS - National Highway System

Veh. Miles - Vehicle Miles of Travel

Definitions

AADT - The annual average daily two-way traffic

ADT - The average daily two-way traffic

Commercial vehicles - Trucks (excluding pickups and buses)

Rural - Traffic data outside urban boundaries

Section Control Points - Any point that reflects a traffic change on a roadway such as junctions, intersections with roadways and intersections with county, municipality or urban boundaries.

Urban - Areas having a population of 5,000 and more

Vehicle Miles of Travel - The ADT multiplied by the section or route length

Weighted - Computer process that averages the data between section control points

**COMPARISON OF ROADWAY MILEAGE, AVERAGE DAILY TRAFFIC
AND DAILY VEHICLE MILES OF TRAVEL**

*Total includes local road VMT. Local road VMT is estimated and not statistically sound.

Local VMT was adjusted in 1997 to reflect additional counts in Billings, Kalispell and Butte.

**November 28, 1995, NHS (National Highway System) came into effect and roadways were realigned. A portion of the former Federal-Aid Primary and Urban systems became part of the NHS. Therefore, there are no direct comparisons between 1995 and the historical data.

MDT attempts to provide accommodations for any known disability that may interfere with a person participating in any service, program or activity of the Department. Alternative accessible formats of this information will be provided upon request. For further information call (406)444-6122 or TDD (406)444-7696.

Three hundred (300) copies of this public document were produced at an estimated cost of \$4.50 per copy, for a total production cost of \$1,350. Distribution costs were \$900.
